

JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country trip in their RV. Recently retired, after spending numerous years working with his brother to develop their crane business into an industry leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

Whilst on their journey, John spent time talking to previous business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a vast market for a product that could quickly and safely lift people in the air to accomplish maintenance and other building services.

Upon returning from their travels, John established a partnership with two friends and acquired a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty employees, they built and sold the first JLG aerial work platform. The business incorporates many of the simple design essentials of that original lift into existing models.

JLG lift trucks have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the company proudly continues to expand itself into various markets worldwide and develops new products to make sure customers are capable of being more effective and perform in the workplace within a safer environment.
