

Drum Clamps

Drum Clamp - Forklifts are really designed to lift, move and store things placed on pallets. For facilities which use drums, they normally require an attachment so as to deal with lifting, moving and storing them. There are several different attachments that a business can utilize for all your drum moving, storing and lifting needs. These attachments are specifically meant in order to handle drum containers - therefore there is no risk of damage to the product or drum container whenever they are stored, moved or lifted.

Drum Positioner And Grab

The drum positioner could be used in order to load and unload drums off of vehicles, racks, and drum stands. These are offered in three and four tine models. This accessory is completely automatic, thus allowing the operator to operate all from the comfort of the lift truck seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This accessory is utilized for drum pyramid stacking.

The drum grab can be mounted to the forks, with a designed objective of handling steel drums that have rolling hoops. Even if the initial reason for the design was to handle steel drums with rolling hoops, the drum grab can help accommodate plastic drums too. Drum capacity maximum is 210 liters for steel drums with rolling hoops and 220 liters for plastic drums.

The Rotator

The drum rotator is one more lift truck attachment which mounts onto the blades themselves. Their purpose is to pick up the drum and turn it upside down. The drum is clamped into the drum rotator utilizing a clamp which fits around the center of the drum. The rotation is done by either a crank handle or a continuous loop chain. The crank handle is utilized for operations that happen beneath shoulder level. For operations which must happen above shoulder level, the continuous loop chain will be used.

The drum tines are simple fork or carriage mounted accessories. They are used for stacking and unstacking 210-liter metal drums. Stacking requires nothing fancy, just easy horizontal positioning of the drums. The carriage-mounted enhancements lessen the load center of the drums.

Automatic Tongs

Drum tongs are available both automatic and semi-automatic models that could be used in the tight head and open topped steel drum kinds. The drum tongs could likewise be connected several various ways to the lift truck. One way is to connect them beneath a fork-mounted hook. One more way is to attach them to a fork-mounted jib or a carriage mounted jib. Either the automatic and semi-automatic have a drum capacity of 210 liters. With the automatic, there is no need for the one operating it to ever leave the seat of the forklift.

Rim Grip Handler

The Rip Grip Drum Handler is the best choice for forklift attachments, when there is a need to store drums with inadequate area available. This particular accessory could be utilized on either 120L and 210L drums. The Rim Grip Handler functions by using steel jaws so as to grab the edge of the drum. It picks the drum up and sets it down without needing any space between the drums. The typical unit in the industry is a zinc-plated handler, even though, this attachment comes obtainable in stainless steel for the food and drink industry.
