

## Electrical Part for Forklifts

Forklift Electrical Parts - Lift trucks together with various forklifts could have particular labels utilized in certain hazardous locations. The label denotes that this certain model of lift truck meets the minimum standards of ANSI/UL 553 meant for electric lift trucks or ANSI/UL 558 used for internal combustion engine lift trucks.

Applications for labeled trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Type Designations, Areas of Use, and Maintenance and Operation. Check with your local insurance carrier and Fire Marshall for further info regarding the permitted uses of industrial powered trucks in your application.

If the specific lift truck satisfies the outlined standards, labels can be placed. A labeled lift truck will show the type of designation put on the nameplate and will have a correctly corresponding label put.
